The Wild Side

Where the Bison Roam!

Once hunted to near-extinction, bison are again roaming the prairies. Don't let their large size (up to 2 metres tall at the shoulder) or weight (over 900 kg) fool you. They can run at speeds up to 65 kilometres per hour!

Bugling Elk (Wapiti)

The elk or wapiti is a very vocal member of the deer family. Young elk keep in contact with their mothers with squeals, chirps and mews. Barks warn others of danger. Fall is the best time to hear the elk.

Busy Beaver

Well-known for building dams, canals, and lodges, you can spot these wide-tailed toothy rodents hard at work in streams and ponds. Best time to see this Canadian symbol performing their engineering marvels? Dawn or dusk.

"Little White Whale"

Nicknamed "sea canaries" for their high-pitched underwater vocalizations, some 3,000 Beluga Whales inhabit the warmer waters of the Churchill River after the ice breaks up. Don't be surprised when their curious nature inspires them to investigate...you.

"White Bear"

Polar Bears congregate near Churchill, Manitoba during October and early November, and can be seen as early as June in coastal areas when there is no sea ice present. Adult males average 300 to 450 kg. At birth, cubs are about the size of their mother's paw and weigh less than 1 kg.

Give these animals the space they need. Your responsible behaviour contributes to the survival of wildlife – and your own safety!
