The Wild Side

Common Loon

You can see the emblem of our dollar, or “loonie,” on the famous Wapizagonke Lake in La Maurice. Did you know there is usually only one couple per lake? Around the crackling fire, listen to the haunting call of the Common Loon.

Humpback Whale

Every year, Humpback Whales travel thousands of kilometres between Quebec and the Caribbean Sea where they give birth. They can be found in the Estuary and the Gulf of St. Lawrence near Mingan Archipelago, the Saguenay–St. Lawrence Marine Park and Forillon where there is an abundance of krill and small fish.

Black-Legged Kittiwake

Did a Black-Legged Kittiwake steal one of your French fries? No. It was a seagull! Get out your binoculars and head to Forillon where you will see the largest colony of REAL Black-Legged Kittiwakes in Eastern Canada! The park’s immense shore cliffs are home to tens of thousands of seabirds that go there to nest and raise their offspring.

White-Tailed Deer

The White-Tailed Deer is commonly found in Quebec. Its offspring, the fawn, is able to stand a few minutes after birth. The best time to spot one is at dawn or dusk. You will easily recognize it when it is running and its small white tail is raised.

Atlantic Puffin

The Atlantic Puffin is nicknamed “Sea Parrot” because of its multi-coloured beak. It is awkward in flight but does well in water. It can hold its breath for more than one minute! The Atlantic Puffin and 35,000 pairs of birds await you at the Mingan Archipelago.

Give these animals the space they need. Your responsible behaviour contributes to the survival of wildlife – and your own safety!
